

Carpet and Upholstery Cleaning

Carpet Cleaning

Why get your carpets professionally cleaned?

Flooring is an investment for the property owner. Carpet cleaning is important to maintaining the overall comfort and monetary value of a property. There are health concerns that can arise from any unsanitary environment, and it can be surprising to learn what can be in dirty carpet. Allergens that are left behind can lead to serious health problems for family members and even household pets. Proper techniques can reduce or eliminate allergens in the environment, improving the health of the occupants.

Proper maintenance begins with regular vacuuming using a high-powered machine. Over time normal wear and tear leads to a dull, soiled appearance. Proper maintenance by the occupants can help keep the flooring looking good, but there comes a time when a **certified technician with a truck mounted unit** has to be called to get to the really deep grime a normal household vacuum can miss.

An often overlooked and unknown issue today is the mandatory cleaning requirements fiber and floor covering manufacturers have placed on their warranties for their products. Starting January 1, 2008, the three largest carpet manufacturers, Shaw, Mohawk, and Beaulieu, began to require that their carpets be cleaned by IICRC Certified Technicians to maintain the warranty. As a result, be sure to look at the warranty requirements on your floor and fiber products to be sure that

you are following their mandatory cleaning requirements. If you do not follow them, you will void the warranty on your new carpet. Here are cleaning requirements from the three largest carpet manufacturers.

Mohawk – “requires professional hot water cleaning every 18 months using cleaning products, equipment, or systems that carry the Carpet Rug Institute Seal of Approval.”

Shaw – “Professional service must be performed by an IICRC Certified Firm. Shaw warranties require that the homeowner be able to show proof of periodic cleaning by and IICRC certified cleaning professional.”

Beaulieu – “Select a service that uses the deep extraction method; vacuuming, pre-spray, agitation, rinse and hot water extraction.”

What we can do for you.

Just like anything in life different situations call for different solutions, this is where our experience and knowledge work for you. Jared has Multiple certifications including [Master Textile cleaner, Journeyman Water Restorer, Journeyman Smoke & Fire Restorer, Natural Fibre Specialist, and Woolsafe NA. Specialist](#). That knowledge is coupled with over 20 years of experience. This means we can assess every job and situation individually, whether that means its refreshing a lightly used carpet, or dealing with heavy soiling, pet stains, kitchen grease in a restaurant, office carpets that have been tracked in from the shop or the antique wool area rug you’ve inherited. We have truck mounted units, portable units bonnet cleaning systems, rotary extraction or manual wands. Products for general cleaning or specialized products safe for natural fibres, deodorizers (even ones specific to certain odours like cigarette smoke for example), emzymes, natural solvents like orange and thyme oil, green products with greenseal and IAQ seal.

A little bit about the green products.

When we first started cleaning you had two choices, either a cleaner good for the environment OR something that cleans effectively. Luckily this is NOT the case anymore the technology in products good for the environment has come a long long way to the point where some of the best cleaning results actually comes from the products that are best for the environment. Greenseal no long means you give up results, we can now get the best of both worlds to do just a little to help save the world.
